

# Errata

## Membrane protein topogenesis

1. Page 20, line 7: The sentence should be: Others are selective transporters, energized by inner membrane proteins.
2. Page 26, reference 108 should be Fujita, H. et al., Positive charges of translocating polypeptide chain retrieve an upstream marginal hydrophobic segment from the endoplasmic reticulum lumen to the translocon. *Mol Biol Cell* **21** (12), 2045 (2010).
3. Page 27, line 35: it should be TM helix 7 not 8
4. Page 31, reference 153 should be Schröder, K. et al, Control of glycosylation of MHC class II-associated invariant chain by translocon-associated RAMP4. *EMBO J.* 18 (17) (1999)
5. Page 32, line 5: translocation of the rest of the protein<sup>161,158</sup>.
6. Page 33, line 1: closed translocon and its lateral gate<sup>128</sup>.
7. Page 34, line 3: remove point ii)
8. Page 42, line 10: alanines until amino acid 248, respectively 344.
